# SELECTED SPEAKERS

**DR LINDA GODFREY** is a Principal Scientist with the Council for Scientific and Industrial Research, based in Pretoria. Her research interests include the role of the waste sector in transitioning South Africa to a green economy; waste innovation; waste economics; and the governance, social and behavioural aspects of integrated waste management. She currently heads up the Waste Research Development and Innovation (RDI) Roadmap Implementation Unit on behalf of the DST.

**BERTIE LOURENS** is the Managing Director of WastePlan Holdings. WastePlan is a national on-site waste management company that specializes in recycling and landfill reduction. Their services include on-site sorting and cleaning, waste reduction, electronic monitoring, carbon footprint audits and total greening. WastePlan employs 1200 staff and services over 200 clients in most of the major cities in South Africa. Bertie is married and have 3 (almost 4) kids and is a passionate aviator.

**JAISHEILA RAJPUT**, PhD, is Founder & CEO of Tomorrow Matters Now | TOMA-Now, a management consultancy that focuses on fostering responsible business through sustainability. We help companies enhance their existing operations by identifying opportunities for cost saving & optimization, become leaders in their industry sector by identifying sustainability-related issues through an integrated value chain analysis & evolve their sustainability agenda to meet changing market needs.

**CHARLES MULLER** is a qualified accountant with an IMM diploma and have been in the plastics and packaging sector for over 36 years. Having worked for a number of local and international Groups, Charles left corporate life in 2013 to start his own consultancy business and remain actively involved in the plastics & packaging space in SA. He sits on a number of different industry executive committees & boards and assumed the role of Executive Director of Packaging SA (formerly PACSA) in September 2013.

**NICK MANNIE** is employed as a Technical Director in Aurecon's Tshwane office. He has more than a decade of experience in solid waste management, including specializations such as landfill construction, planning and policy formulation, technical and operational support, efficiency and optimization in public solid waste management practices, system implementation, change management and the introduction of alternative waste management approaches.

**REON PIENAAR** is Associate Engineer and Practice Area Lead for Waste Services Africa at AECOM SA (Pty) Ltd. He is registered as a Professional Engineer with the Engineering Council of South Africa and holds BEng and BEng Honours degrees from the University of Pretoria where he is currently finalising a Masters Degree in Environmental Engineering.

**HERMANN ERDMANN**  
CEO, REDISA
